

A New Hearth – Lighting Evaluation

STEP 1 - LIGHT COUNTING SHEET

COPY – enough sheets, one per room or space in your home

COUNT – the number of lamps and lights for each room, write down the wattage and bulb type

CALCULATE – the total watts used per room

ROOM	
-------------	--

LIGHTING TYPE	COUNT	WATTAGE	BULB TYPE
RECESSED			
CEILING			
WALL			
TABLE			
CABINET			
STOVE			
CLOSET			

If there is more than one kind of lighting type just enter the information like 2/60 or 4/40, meaning 2 lamps at 60 watts and 4 lamps at 40 watts. You can also abbreviate the bulb type to

- **IN** for incandescent, - **FL** for florescent, and - **LV** for low voltage.

This lighting evaluation is a project of Holt Design and the Andover Townsman.
